

FALL PROTECTION

FOR CONSTRUCTION

AND INDUSTRY

ROOF WORK

When working on roofs, it's crucial to create the right conditions to be able to work safely and flexibly. If you work on steep roofs, the Worker Roofer Pro kit should be completed with another adjustable fall arrest line to use as a back-up.

Available in different solutions depending on environment and working methods. Contact Cresto Group for more information.

ANNUAL INSPECTION

A fall protection product needs to undergo an annual inspection at least once every 12 months. You can leave your products to a certified competent person or Cresto Group, and we will check that they are approved for use.

On our website, you will find information on how and where to send your products for annual inspection.

INSPECTOR

With the help of Inspector, our online database, you don't have to keep track of when the annual inspection of your products and fall protection systems is to be carried out. Register your products and get reminders before the next examination. Smart, digital, accessible and safe.

Annual inspection, service and training performed by Cresto Group staff are documented in our online inspection database Inspector.
