

Cresto, Core Single-Flex H 1507

Fall arrest lanyard 1507

- Singel fall arrest lanyard
- 60 mm hooks
- 30 mm flexible webbing

EN 355 : 2002

Product description

A single fall arrest lanyard provides secure protection when working on skylifts and scaffolding. Core Single-Flex has the same functions as Core Twin-Flex except that it has only one webbing and one hook instead of two. Core Single-Flex is manufactured as a flexible tube with internal elasticity, which allows you to stretch the line to a maximum length. At the beginning of the rope there is an external absorber mounted which is released in case of a fall and catches you. Tested and approved for users up to 100 kg. The cover on the absorber can easily be replaced if it becomes dirty or damaged to ensure that the rope underneath is protected in the best way.
