

CRESTO, BOLT BAG

Bolt and material bag

- Unique OnePull opening and closing
- Water resistant material
- Tool lanyard connections

Product description

The CRESTO Bolt Bag collection features cylindrical bags designed for bolts and other small items, including a small internal wall at the bottom for better organization.

The CRESTO Bolt Bag series comes in two sizes, small and large, offering versatility to suit different needs. Featuring the innovative OnePull Locking System, it enables quick and secure one-handed operation, making it an essential choice for those working at heights where preventing dropped tools is critical.

With its distinctive lace locking system, the bag ensures enhanced security and effortless access to stored items. It is designed with an external loop system that includes five lanyard loops for tool lanyards, an internal daisy chain with six additional loops for improved tool organization, and small external pockets for quick-access storage.

Crafted from waterproof materials, the bag is built for durability in demanding work environments while maintaining seamless functionality.

Developed for professionals who need reliable, safe, and efficient tool storage at heights, the CRESTO Bolt Bag delivers security, accessibility, and durability in a smart and practical design.
